GIANT DARWIN TULIPS

We strongly recommend this class of Tulips for garden decoration in beds as well as in groups in the herbaceous border and amongst shrubs. Grown for cut-flowers, they will prove very valuable at a time when our gardens yield so little for the decoration of our rooms. They flower during the middle part of May, a period when the spring flowers are over and summer flowers such as Roses have not yet come in. The blooms last in condition a very long time.

By forcing in pots they may be had in bloom in February or even earlier, most of the varieties improving in color by protection under glass or canvas. The list of varieties we offer below has been carefully selected and includes all the exquisite and new varieties. We have discarded a great many varieties which we considered inferior to those we now offer.

Varieties Recommended for Forcing

The undernoted varieties are very suitable for forcing purposes, and can be had in flower from end of January up till April. Their large flowers, lively color, long strong stems, make them indispensable for the grower of cut flowers. They want a little more room in the boxes than ordinary Tulips.

TULIPS

The Tulip is the most popular of all Spring-flowering bulbs. Their brilliancy of color, beauty of form and gorgeous shades render them the most effective of all bulbous plants for bedding and planting in groups or borders. For pot culture and forcing for Winter flowers, several varieties are invaluable. Plant outside in October or November about four inches deep and four inches apart. The soil should be well dug and a liberal supply of well-rotted manure applied.

Varieties prefixed by an asterisk (*) are the best for forcing.

NARCISSUS, or DAFFODILS

Every year the demand for these charming Spring-flowering bulbs is increasing. They are of easy culture, thriving in almost any soil, and are largely used for naturalizing. The following list contains all the most beautiful varieties, several of which are sweet-scented and excellent for cutting purposes.

Outdoor Culture. Plant four to five inches deep and four to six inches apart, according to size of bulbs. Being perfectly hardy, they make an excellent effect among shrubbery in borders, etc.

Pot Culture. Use same composition as for Hyacinths. For effect, plant six bulbs of one variety in bulb-pan or large pot. Keep in a cool dark place for a few weeks until well rooted.

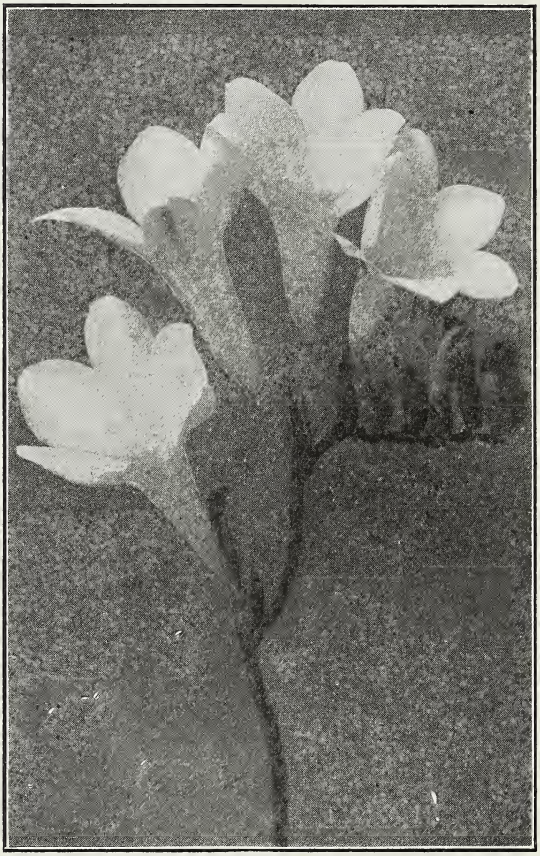
FREESIAS



FREESIA PURITY

The most popular of all Winter-flowering bulbs, for no other excels it in fragrance, grace of appearance and ease of culture. If planted early it can be had in bloom by Christmas. Ten or twelve bulbs should be used for a 6-inch pot or pan. Freesias do well when planted in benches in a cool house or frame.

Freesia Purity

This magnificent, glistening pure snow white Freesia is undoubtedly the finest variety grown and is becoming more popular every year. The flowers are extra large and very fragrant. One bulb will throw from three to five flower spikes, each of which will have eight to eleven buds borne on extra long stiff stems, showing well above the foliage. Splendid for decorative purposes.

Monster Bulbs. Doz. $1.00, 100 $6.00, 1,000 $55.00.

Large Selected Bulbs. Doz. 75c., 100 $5.00, 1,000 $45.00.
